About

The Freedom Forum First Amendment Center at Vanderbilt University has written a profile of Tom Blanton.

FROM THE BBC, Jan. 27, 2006:

The National Security Archive obtained a declassified Pentagon "Information Operations Roadmap" using the Freedom of Information Act. Officials in the Pentagon wrote it in 2003. The Secretary of Defense, Donald Rumsfeld, signed it. The "roadmap" calls for a far-reaching overhaul of the military's ability to conduct information operations and electronic warfare. And, in some detail, it makes recommendations for how the US armed forces should think about this new, virtual warfare. [LINK TO ARTICLE](#) / [ALTERNATE LINK](#)
